

The Do Not Call law is a real blessing and a key to the protection of our right to privacy. No more than one would let unwanted strangers enter the house through the front or side door, private citizens should not be harrassed by unsolicited phone calls. In fact the laws could be made more stringent because many organizations skirt the law by pretending "not to sell anything" but still pester the public with unwanted calls, so PLEASE allow NJ to maintain its laws and consider making the US wide standard the strongest possible.
